EDUCATION

Degree	Institute	CGPA / Percentage	Year
B.Tech CSE	Bennett University, Greater Noida	8.67	2023-2027
Senior Secondary	D.A.V. Public School, kurukshetra	71.5%	2022-2023
Secondary	D.A.V. Public School, kurukshetra	80.5%	2020-2021

TECHNICAL SKILLS

- Languages:** C++, Python, **DB:** MongoDB, MySQL, Qdrant **Web & Framework:** React.js, HTML, CSS, JS, **AI/ML:** NumPy, Pandas, Scikit-learn, TensorFlow, GenAI, LLM Integration, RAG, Reinforcement Learning

EXPERIENCE

- Project Intern – RAC, DRDO (Recruitment Assessment Center)** *june'25 - present*
 - Designed the architecture for a Gen AI-powered Interview Curation system, leveraging ML similarity measures and LLMs.
 - Developed the system to reduce manual effort and improve match accuracy by 60%.
 - Integrated web scraping to auto-fetch evaluator profiles, enabling real-time panel recommendations

PROJECTS

- Pravah: AI-Powered Smart Traffic Management System (SIH 2025 Winner)** *Sep' 25 – Present*
Tech: Python, OpenCV, SUMO, Pygame, RL, LSTM, Fast api
 - Optimized signal timings using **Reinforcement Learning (RL)** and utilized **OpenCV/SUMO & Pygame** for real-time vehicle detection and simulation..
 - Developed a commuter app and admin dashboard to **forecast congestion (LSTM)**, achieving a **15-20% reduction in travel time**.
- MIRA: Matching Interviewers with Resume using AI (SIH 2024 Winner)** *September'24 - December'24*
Tech Stack: Vector DB, ETL Pipelines, LLM, Mistral-7B, SBERT, BERT. [G]
 - Built an **LLM-based** expert panel matcher that curates interviewers by skill-expertise alignment, reducing HR effort and manual screening time.
 - Built a resume parsing pipeline using **ETL and vector embeddings**, reducing processing time by over 40% through automated data handling and semantic matching.
 - Engineered a **scalable** recommendation system using dense vector search to handle high query loads with low-latency.
 - Ensured code quality and reliability by **implementing unit tests** for the ETL pipeline.
- Convera AI:Voice-Based Knowledge Builder for Personalized AI Agents (Hackachinno 2025 Winner)***February'25 – June'25*
Tech Stack: Mistral (Ollama), Whisper, FastAPI, Web Speech API, Flask, SQLite [G]
 - Engineered a voice-driven AI that builds custom knowledge bases from conversations using **Whisper** for speech-to-text and a local **LLM**, increasing accessibility by over 40
 - Deployed a full-stack web application using **FastAPI and Flask** to deliver real-time, context-aware, and profession-specific responses through a conversational UI.

OTHER PROJECTS

Weather Notification System: An **IOT and Calm Tech** project for weather pridiction on a smart lamp enabling ambient and non-intrusive alerts.[G]

ACHIEVEMENTS AND HACKATHONS

- Cyber AI and Agentic AI Hackathon 2025** (International Winner - University of Derby and Ulster University, UK)
- Student Innovation Excellence Award 2025** (Times Now Education Summit - Honored for AI and Smart Mobility)
- Smart India Hackathon 2024 and 2025** (2x National Winner - Govt. of India)
- AI Innovate 2025 (Microsoft)** (1st Runner-up – Top 1.7% among 300+ teams)
- Hackaccino 2025** (Track Winner – 1800+ participants)
- 2X Smart BUHackathon ('24 and '25)** (Top 1.75% – Ranked 15 and 8 out of 400+ teams)
